## Leading the industry with alternative fuel options

The fuel industry is changing as consumers, businesses and government agencies continue to demand more fuel options that are better for the environment and the bottom line. As a leading producer of advanced biofuels and developer of renewable chemicals, Renewable Energy Group, Inc. (REG) is committed to meeting those demands with biofuel alternatives as well as traditional fuel options.

By providing a variety of high-quality fuels, we can meet the needs of a diverse marketplace — from travel centers, convenience stores and petroleum majors to fleets, heating oil distributors, farmers and mining operations.

We are not new to the fuel business. We offer a nationwide production, distribution and logistics system, including state-of-the-art biorefineries located throughout the country. This ensures you will have easy access to a steady supply of high-quality fuels including:

**BIODIESEL** / **BIODIESEL & BIOHEAT™ BLENDED FUELS** / **RENEWABLE HYDROCARBON DIESEL (RHD)** / **ULSD & HEATING OIL**

As a company that has helped build today's biodiesel industry — and has become a leading producer — we understand and believe in the power of biodiesel to increase long-term energy security and diversity, promote environmental stewardship and generate economic development. As your fuel partner, we can put that expertise and dedication to work for you.

## **REG-9000™ Biodiesel** *More than a billion gallons strong*

After selling more than 1 billion gallons and with nearly two decades of production and marketing experience, we know biodiesel. Over the years, we have seen more and more businesses and consumers make the move to biodiesel blended fuel — for its efficiency, performance, environmental benefits and economic advantages.

### *High-quality B99 biodiesel*

REG-9000™ biodiesel is available from our commercial-scale biodiesel production facilities. This high-quality biodiesel delivers a wide range of benefits, including:

- ◆ **Enhancing energy security and diversity**
- ◆ **Reducing harmful greenhouse gas emissions**
- ◆ **Increasing lubricity to keep engines cooler, running quieter and operating longer**
- ◆ **Reducing lifecycle greenhouse gas emissions by 57 – 86 percent**

While demand for alternative fuel sources grows, biodiesel is not only readily available — it qualifies for various state and federal biofuel tax incentives. In addition, REG biodiesel is available with or without RINs (Renewable Identification Numbers), creating an additional opportunity for added revenue. REG has dedicated RIN accountants on staff to help guide you through the options available for your business.

### *Unmatched quality*

With a laboratory at each biorefinery, quality assurance is our No.1 priority. REG-9000 biodiesel is made with the most advanced quality control measures in the industry.

- ◆ **Meets or exceeds the stringent ASTM D6751 quality standard**
- ◆ **REG currently has eight BQ-9000® accredited plants — more than any other biodiesel producer**

### *Reliable supply*

REG offers the distribution and logistics capabilities that stretch from coast to coast and to nearly every state, ensuring that our product will be there to serve the needs of both you and your customers.

- ◆ **Flexibility in product availability from multiple plants and terminals across the country**
- ◆ **National supply and logistics for on-demand biodiesel delivery, including a dedicated rail car fleet and nationwide truck fleet partnership**

## Bioheat™ Blended Fuel

*Simple, smart solution*

Bioheat™ blended fuel, a blend of biodiesel and home heating oil, provides a reliable, superior-quality fuel source for heating oil customers in the Northeast region of the U.S. It offers an attractive alternative to traditional home heating oil:

- ◆ Requires no retrofitting or modifications to equipment
- ◆ Enhances and extends equipment life
- ◆ Reduces periodic maintenance intervals
- ◆ Involves no changes in service protocols
- ◆ Introduces less pollution — burns cleaner, more completely and more efficiently while producing lower levels of unburned hydrocarbons

Cities throughout the Northeast are encouraging the use of biodiesel and Bioheat blended fuels. REG can help you take advantage of these programs and is ready to serve you with the product, capacity and expertise to fuel your business.

## REG Energy Services

*One source for all your fueling needs*

REG Energy Services makes it easy to meet the demand with a variety of fuel alternatives. We offer blended fuels, heating oil and ultra-low sulfur diesel (ULSD) at several terminal locations. As your business grows, you can get everything you need from one fuel supplier including:

- ◆ Ultra-low sulfur diesel (ULSD)
- ◆ Heating oil (ULSD Dyed)
- ◆ B99 biodiesel
- ◆ Biodiesel and Bioheat blended fuels

Plus, you'll receive all the added benefits of working with an industry leader.

- ◆ Competitive pricing
- ◆ Added convenience — we do the blending for you
- ◆ Quality, ratable fuel
- ◆ Reasonable credit and payment terms
- ◆ Biodiesel expertise — from tax credits to RINs to infrastructure
- ◆ Knowledgeable and experienced sales team

*Offering biodiesel blended fuels provides a convenient solution to better meet the needs of you and your customers.*

## **REG-9000™ / RHD** *(Renewable Hydrocarbon Diesel)* *A new fuel alternative*

REG is always looking for new fuel options. And this advanced biofuel reduces greenhouse emissions while meeting the ASTM D975 specification for petroleum diesel. It can be added to the existing pipeline system — making it easy to incorporate into the diesel stream:

- ◆ **Blends with biodiesel and petroleum diesel**
- ◆ **Compatible with any diesel engine without modifications**
- ◆ **Aids self-ignition of fuel and allows for easier starting, smoother running engines and reliable operation because of increased cetane**

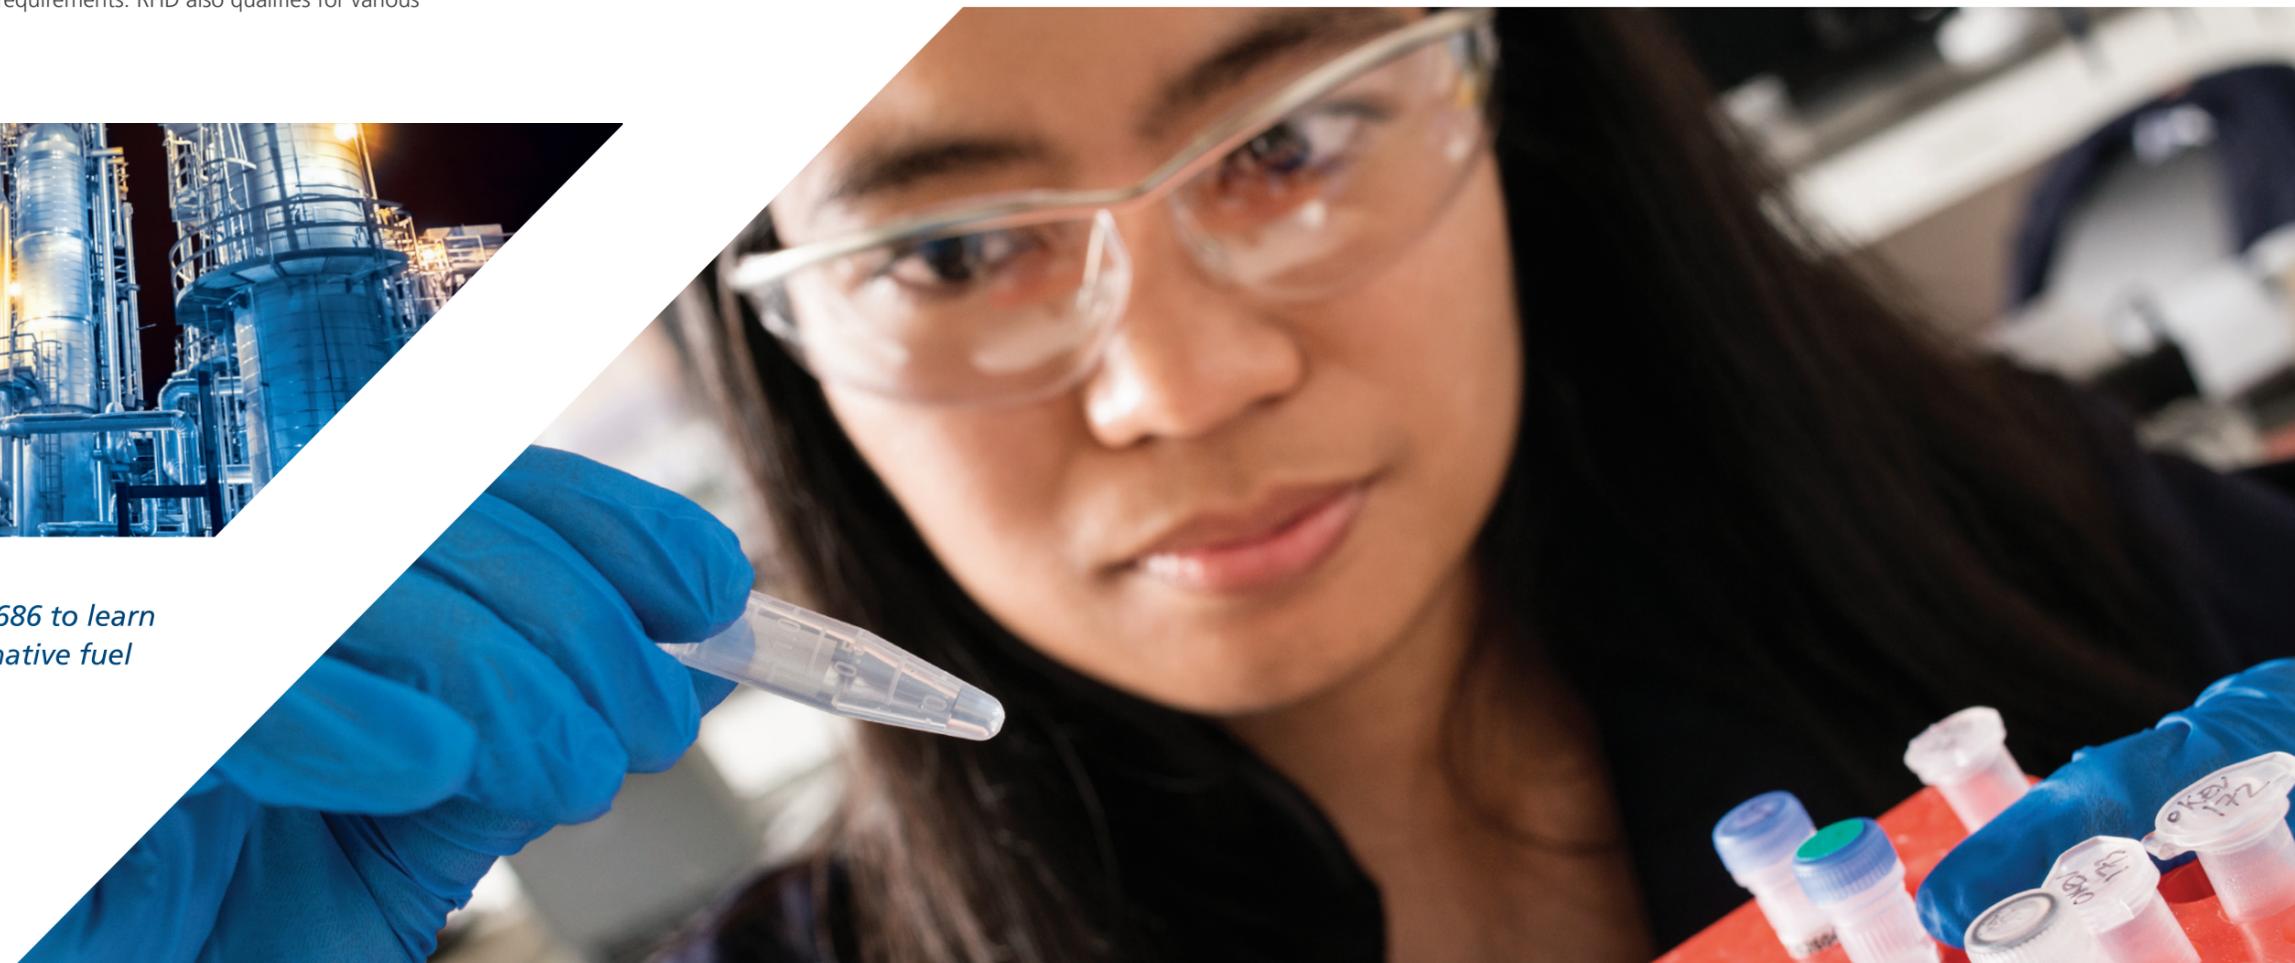

RHD is included in the Energy Policy Act of 1992 (EPA) standards to meet a portion of the annual Alternative Fuel Vehicle acquisition requirements. It has been tested by the EPA and passes their Clean Air Health Effects testing requirements. RHD also qualifies for various state and federal biofuel tax incentives.

*Contact us today at (888) REG-8686 to learn more about how this new alternative fuel can help grow your business.*

## **Research and Development** *Innovation for tomorrow*

REG started with biodiesel. But we are not finished looking for new solutions. REG Life Sciences is focused on exploring and harnessing the power of industrial biotechnology to develop practical, commercially relevant technologies that produce renewable alternatives to petroleum-based chemicals, fuels and beyond.

*Our research and development team is working to create tomorrow's solutions today.*

## **Your REG Team** *Fueling a strong partnership*

We know that quality products and dependable distribution are just part of what you need to grow your business. That's why we take pride in creating a true partnership with you — to put it all together to understand and meet your unique needs.

No matter your role in the supply chain, we make it our business to know your business. REG has a dedicated and knowledgeable sales and support staff to assist you with all aspects of your alternative fuel needs — from showing you how to start a blending operation to helping you navigate the complexities of biofuel tax credits.
